EP-GRIP® FUN

PLAYTIME FUN AND SAFETY FOR THE LITTLE ONES

EP-GRIP® FUN

Running, playing, romping, laughing - whether children are whizzing around the bend in a bobby car, playing tag oder taking a spin around the playground, EP-GRIP® FUN makes playing twice as much fun. The epoxy resin-based surface, into which rubber granules is interspersed, ensures greater safety and scores points with its pleasant feel and bright colors.

Design child-friendly play areas that are functional, safe and aesthetically pleasing. EP-GRIP® FUN is the ideal solution for safe and attractive surfaces for children.

— Safety is the highest priority

Safety comes first so that children can romp and play to their heart's content. The interspersed rubber granules are cushioning and provide light fall protection. It also reduces the risk of slipping. An advantage that is particularly beneficial for children who are still unsteady on their feet.

— A world full of colors

A Bobby Car racetrack in bright yellow, the school playground in rich blue and the path to the playground in friendly green - all options are open to you in terms of color! Choose from different shades and give your play area a colorful appearance.

— Pleasant touch

Children who like to walk barefoot, do handstands or do cartwheels will be impressed by the excellent feel of the surface. Thanks to the different grit sizes, EP-GRIP® FUN is sometimes coarser, sometimes finer - but always tailored to your needs.

— Fast application

EP-GRIP® FUN also scores points for speed: after application, your surface is ready for playing and romping around within a very short time. It doesn't matter whether it's an existing surface or a new build - EP-GRIP® FUN can be integrated at any time without any problems.

— Easy to clean

Cleaning the surface is particularly easy: sand can be swept off effortlessly; in the fall you can easily remove leaves and acorns from the playground and other areas; in spring and summer you don't have to worry about pollen and in winter the granules reduce the risk of slippery surfaces and ice.

EP-GRIP® FUN

Colorful, safe, sustainable.

Safety & comfort

The special granules create a soft, cushioning surface that reduces the risk of injury from falls and provides a comfortable walking surface. Ideal for areas where children play and run.

Color & design

With a wide range of color nuances and the option of using different granule sizes, you can create colorful and creative designs. Design your play areas to be individual, visually appealing and functional.

Noise reduction

The dampening properties of the granules reduce the noise level - an advantage in densely populated residential areas, modern residential districts and near schools and nurseries. EP-GRIP® FUN protects children and residents from excessive noise.

Grip & slip resistance

The textured surface of the granules offers improved grip and slip resistance. This increases safety for children playing and running on these surfaces.

Durable & easy to maintain

The robust materials and hard-wearing coating ensure that EP-GRIP® FUN surfaces are durable and easy to maintain. Cleaning is easy with standard tools, which minimizes maintenance work.

Sustainability

On request, it is possible to produce the granules from recycled materials. This makes EP-GRIP® FUN an environmentally friendly option for play surfaces, contributes to sustainability and reduces the ecological footprint of your project.

Since 1956, POSSEHL SPEZIALBAU has been active in the field of maintenance of vehicular-use surfaces, industrial and manufacturing areas, and aircraft-use pavements to maintain their value and ensure their use.

The company's headquarters are in Sprendlingen, Rheinland-Pfalz, Germany. In order to be closer to its customers, POSSEHL SPEZIALBAU is divided into regional divisions and operating facilities. The division Special Coatings for Airfield and Road Infrastructure is also based in Sprendlingen, and is internationally active.
